---

Mynxx is the first ever RocketTheme template to incorporate the popular Joomla ecommerce / shopping component, Virtuemart. This integration is applied in a variety of platforms, such as modules, a custom virtuemart theme and template coding.

The custom Virtuemart theme allows us to override the core output, which results in a more seamless integrated with the Virtuemart shopping component.

The screenshot displays the Mynxx Joomla template homepage. At the top, the Mynxx logo is accompanied by a navigation menu with links for Home, Features, Typography, Tutorial, Stuff, Virtuemart, Wrapper, and RocketTheme. Below the header, a navigation bar includes Home, Cart (0 items), Login, Font Size, and Text Size. The main content area features a large banner for a MacBook Pro advertisement with the headline "The world's thinnest and lightest 17-inch notebook." Below the banner is a grid of four product cards: Mac Pro (\$2,499.00), iMac (\$1,199.00), Mac Mini (\$599.00), and MacBook (\$1,299.00). Each card includes an image of the product and an "Add to Cart" button. To the left of the main content is a sidebar with a search bar, product categories (Shop Mac, Shop iPod, Shop iPhone, Mac Accessories, iPod Accessories, iPhone Accessories), and links for "More Information" and "New Top Endic". The main content area contains two articles. The first article, "Virtuemart Integration. First Time ever", discusses the integration of Virtuemart into the Mynxx template. The second article, "Perfect Columns. Source ordered & SEO optimised.", describes the layout structure designed for maximum SEO results. On the right side, a "Variation Chooser" is visible, showing a preview of the MacBook Pro advertisement and a "Select" button. Below the variation chooser is a "Featured Products" section with a "Macbook White" product card.

## Features

- Virtuemart Integration
- Source Ordered Layout
- RokBox Powered Position
- Mootools Dropdown Panels
- Assortment of Custom Extensions

## Mynxx – Joomla Template - RocketTheme
