

Be part of the latest innovation in the Joomla! templates! This months YOOtheme template Evolution is packed with brand new features. Now you can take the full advantage of each module position, using the flexible Module Proportions feature. This addition to the YOOtheme module system, gives you the possibility to chose between different module proportions for each module position. By default you get two module proportions: equal and golden ratio. Further you are able to easily create your very own module proportion sets. Also this month YOOtools gets a exciting addition too! The YOOgallery which delivers a easy and smart way to publish multiple images in your Joomla! website. The YOOgallery extension is available as module and plugin for Joomla! 1.5 and 1.0. Enjoy!

Features

- Enhanced module system with flexible proportions
- New advanced YOOgallery Module and Plugin
- Sub titles for the menu items
- Fully sliced Fireworks .png Source files
- Native Version for Joomla 1.5
